Gloss MN427A

Not recommended for use where high UV exposure is likely

For internal use only

For General Industrial Range

Are recommended to be over coated with Interpon Clear powder coating for exterior use or aggressive internal applications

Are ColorSteel® Coordinate Colors

Colors displayed on this color card are a guide only and have been matched as close as possible to Interpon production standards under daylight conditions. Due to the nature of the printing process some degree of color and gloss level variation may occur. Where more than one finish is available product color may vary. We recommend that you use production line prepared samples for final color selection or approval. Most gloss finishes on this card are available in EC technology as Made to Order MiniB.

## Your Choice Of Color

AkzoNobel understands the importance of color and finish for your business to satisfy customer needs. If you cannot find the right color or finish in this extensive offer, Colors of New Zealand, why not take advantage of our made-to-order color service. For smaller projects requiring as little as 20kg, Interpon MiniB™ and Interpon MiniB™ Micro provide fast service on small batch made-to-order colors that are specific to your needs. Some conditions do apply such as choice of color and product. Please contact the AkzoNobel Customer Care Team for additional advice.

## HOW TO SPECIFY Interpon POWDER COATINGS

Once you have chosen Interpon powder coatings for your project, it's important to use the correct product. So we make specifying Interpon powder coatings easy. Simply:

- Nominate the Interpon product. e.g. Interpon D1000.
- Nominate the color, finish and product code.  
e.g. Silver Comet Satin GY184C.

To find your nearest Interpon Applicator, please contact your Interpon representative or the AkzoNobel Customer Care Team on 0800 150 527.

## Interpon D Approved Applicators

AkzoNobel has developed the **Interpon D** Approved Applicators Network to support the **Interpon D** Global Warranty Program. This program is designed to ensure the Interpon powder coating you choose is applied correctly, meeting Interpon powder coatings warranty requirements to local and international standards. To view all **Interpon D** Approved Applicators please visit [www.interpon.co.nz](http://www.interpon.co.nz)

For more information or to become an **Interpon D** approved applicator please speak with your Interpon technical representative.

## Colors of New Zealand

People are driven by emotion – and color elicits different emotions in people. As the world's largest coatings company, no other company has more experience in color trends than AkzoNobel. Home to the Aesthetics Centre, our in-house color and design experts anticipate and predict movements in trends that affect color and coating choices for architectural applications. We have drawn on the knowledge of our global Aesthetics Centre, along with our own New Zealand insights, to produce this Residential and Industrial Powder Coatings Collection – Colors of New Zealand.

## The Interpon Range

### Interpon D1000

**Interpon D1000** is a highly durable powder coating developed on proprietary technology, supported by a global 10 year warranty for color and film integrity. **Interpon D1000** provides an ideal finish for architectural residential applications. Offering excellent application performance with superior mileage, high powder utilisation and faster curing, **Interpon D1000** is our most versatile and best performing product in its class.

## Interpon D1010 Premium

**Interpon D1010 Premium** is an ultra durable powder coating developed on in-house resin technology providing a premium finish for architectural residential and commercial applications. **Interpon D1010 Premium** offers the applicator exceptional application performance with superior mileage and the support of a global 10 year warranty.

## Interpon TC

**Interpon TC** is a durable powder coating designed to meet the specific needs of the Industrial and General Trade Coater for interior and exterior applications. The **Interpon TC** range of powdercoatings feature high transfer efficiency, excellent coverage and high levels of damage resistance. **Interpon TC** is available in an extensive range of bright colors, ripples, textures and special effect powders.

## Care and Maintenance

Maintaining the integrity of your powder coated products is just like caring for your car – and is a smart way to protect your investment. Over time with exposure to the elements, powder coatings may show signs of weathering such as loss of gloss, chalking and slight color change. A simple regular clean will minimise the effects of weathering and will remove dirt, grime and other build-up detrimental to all powder coatings. The best method of cleaning is by regular washing of the coating using a solution of warm water and nonabrasive, pH neutral detergent solution. Surfaces should be thoroughly rinsed after cleaning to remove all residues. All surfaces should be cleaned using a soft cloth, sponge or a soft natural bristle brush.

Zones (NZ3604)	Corrosivity Level	Environment Type	Required Cleaning*
B	Low / Medium	Non- Hazardous Environment. Must be located >1000m from salt water or surf line.	Every 12 Months
C	High	Swimming Pools, Light Industrial, Coastal Environments. Must be located >100m from salt water or surf line.	Every 6 months
D	Very High	Beach Front/ Marine, Heavy Industrial Environment and areas of high geothermic exposure.	Every 3 Months
